

- The Galapagos lie 600 miles off the western coast of Ecuador
- Created from volcanic eruptions 5 million years ago, the islands are so isolated that over 1,900 species of animals and fauna cannot be found anywhere else on earth.
- The animals have never associated humans with danger providing amazing opportunities to interact and connect with these wonders.
- The terrain is as diverse as the wildlife including rain forests, mountains, black coral beaches, and rocky outcroppings.
